#### **KONGU ENGINEERING COLLEGE, PERUNDURAI, ERODE – 638060**

(An Autonomous Institution Affiliated to Anna University)

#### **REGULATIONS 2022**

#### CHOICE BASED CREDIT SYSTEM AND OUTCOME BASED EDUCATION

# MASTER OF COMPUTER APPLICATIONS (MCA) DEGREE PROGRAMME

These regulations are applicable to all candidates admitted into MCA Degree programme from the academic year 2022 - 2023 onwards.

#### 1. DEFINITIONS AND NOMENCLATURE

In these Regulations, unless otherwise specified:

- i. "University" means ANNA UNIVERSITY, Chennai.
- ii. "College" means KONGU ENGINEERING COLLEGE.
- iii. "Programme" means Master of Computer Applications (MCA) Degree programme
- iv. "Course" means a Theory / Theory cum Practical / Practical course that is normally studied in a semester like Data structures and Algorithms, Data Communication Networks etc.
- v. "Credit" means a numerical value allocated to each course to describe the candidate's workload required per week.
- vi. "Grade" means the letter grade assigned to each course based on the marks range specified.
- vii. "Grade point" means a numerical value (0 to 10) allocated based on the grade assigned to each course.
- viii. "Principal" means Chairman, Academic Council of the College.
- ix. "Controller of Examinations" means authorized person who is responsible for all examination related activities of the College.
- x. "Head of the Department" means Head of the Department concerned of the College.

# 2. PROGRAMME

The MCA programme approved by Anna University, Chennai and All India Council for Technical Education, New Delhi is offered by the College.

# 3. ADMISSION REQUIREMENTS

Candidates seeking admission to the MCA Degree Programme shall be required to have passed an appropriate qualifying Degree Examination of Anna University or any examination of any other University or authority accepted by the Anna University, Chennai as equivalent thereto, subject to amendments as may be made by the Anna University, Chennai from time to time. The candidates shall also be required to satisfy all other conditions of admission prescribed by the Anna University, Chennai and Directorate of Technical Education, Chennai from time to time. To gain the fundamental knowledge of computer science, it is mandatory for the candidates from other than Computer Science, Information Technology, Computer Application or any other computer science equivalent backgrounds of study shall complete four additional non-credit courses as bridge courses in the first and second semesters as prescribed by the College.

#### 4. STRUCTURE OF PROGRAMME

# 4.1 Categorisation of Courses

The MCA programme shall have a curriculum with syllabi comprising of theory, theory cum practical, practical courses in each semester, professional skills training/industrial training, project work, internship, etc. that have been approved by the respective Board of Studies and Academic Council of the College. All the programmes have well defined Programme Outcomes (PO), Programme Specific Outcomes (PSO) and Programme Educational Objectives (PEOs) as per Outcome Based Education (OBE). The content of each course is designed based on the Course Outcomes (CO). The courses shall be categorized as follows:

- i. Bridge Courses (BC) like Problem Solving Techniques, C++ Programming, Computer Organization and Design, Operating Systems
- ii. Foundation Courses (FC)
- iii. Professional Core (PC) Courses
- iv. Professional Elective (PE) Courses
- V. Employability Enhancement Courses (EC) like Mini Project, Project work, Professional Skills/Industrial Training and Internship in Industry or elsewhere

# 4.2 Credit Assignment

# 4.2.1. Credit Assignment

Each course is assigned certain number of credits as follows:

Contact period per week	Credits
1 Lecture / Tutorial Period	1
2 Practical Periods	1
2 Project Work Periods	1
40 Training / Internship Periods	1

The minimum number of credits to complete the MCA programme is 85.

# 4.3 Employability Enhancement Courses

A candidate shall be offered with the employability enhancement courses like mini project, project work, professional skills training/ industrial training and internship during the programme to gain/exhibit the knowledge/skills.

# 4.3.1 Professional Skills Training/Industrial Training

A candidate may be offered with appropriate training courses imparting programming skills, communication skills, problem solving skills, aptitude skills etc. It is offered in second semester including vacation periods and it can carry two credits.

(or)

A candidate may be allowed to go for training at research organizations or industries for a required number of hours in second semester including first semester vacation period. Such candidate can earn two credits for this industrial training course in place of Professional Skills Training course in second semester.

#### 4.3.2 Mini Project

A candidate shall earn two credits by successfully completing the project by using his/her innovations in third semester during his/her programme.

#### 4.3.3 Internships

The curriculum enables a candidate to go for full time project through internship during entire final semester and can earn credits vide clause 7.6 and clause 7.10.

A candidate is permitted to go for full time project through internship during final semester in place of Project work. Such candidate shall earn the minimum number of credits required to complete final semester other than project/internship through either approved Value Added Courses /Online courses / Self Study Courses or Add/Drop courses as per clause 4.4 and clause 4.5 respectively.

Assessment procedure is to be followed as specified in the guidelines approved by the Academic Council.

# 4.4 One / Two Credit Courses / Online Courses / Self Study Courses

The candidates may optionally undergo One / Two Credit Courses / Online Courses / Self Study Courses as elective courses.

- **4.4.1 One / Two Credit Courses:** One / Two Credit courses shall be offered by the college with the prior approval from the respective Board of Studies. A candidate can earn a maximum of six credits through one / two credit courses during the entire duration of the programme.
- **4.4.2 Online Courses:** Candidates may be permitted to earn credits for online courses, offered by NPTEL / SWAYAM / a University / Other Agencies, approved by the respective Board of Studies.
- **4.4.3 Self Study Courses:** The Department may offer an elective course as a self study course. The syllabus of the course shall be approved by the Board of Studies. However, mode of assessment for a self study course will be the same as that used for other courses. The candidates shall study such courses on their own under the guidance of member of the faculty. Self study course is limited to one per semester.
- **4.4.4** The elective courses in the final year may be exempted if a candidate earns the required credits vide clause 4.4.1, 4.4.2 and 4.4.3 by registering the required number of courses in advance (up to third semester).
- **4.4.5** A candidate can earn a maximum of 15 credits through all one / two credit courses, online courses and self study courses.

# 4.5 Flexibility to Add or Drop Courses

- **4.5.1** A candidate has to earn the total number of credits specified in the curriculum of the respective programme of study in order to be eligible to obtain the degree. However, if the candidate wishes, then the candidate is permitted to earn more than the total number of credits prescribed in the curriculum of the candidate's programme.
- **4.5.2** From the second to third semesters the candidates have the option of registering for additional elective courses or dropping of already registered additional elective courses within two weeks from the start of the semester. Add / Drop is only an option given to the candidates. Total number of credits of such courses during the entire programme of study cannot exceed six.
- **4.6** Maximum number of credits the candidate can enroll in a particular semester cannot exceed 30 credits.
- **4.7** The blend of different courses shall be so designed that the candidate at the end of the programme would have been trained not only in his / her relevant professional field but also would have developed to become a socially conscious human being.
- **4.8** The medium of instruction, examinations and project report shall be English.

#### 5. DURATION OF THE PROGRAMME

- **5.1** A candidate is normally expected to complete the MCA Degree programme in 4 consecutive semesters (2 Years), but in any case not more than 8 semesters (4 Years).
- 5.2 Each semester shall consist of a minimum of 90 working days including continuous assessment test period. The Head of the Department shall ensure that every teacher imparts instruction as per the number of periods specified in the syllabus for the course being taught.
- 5.3 The total duration for completion of the programme reckoned from the commencement of the first semester to which the candidate was admitted shall not exceed the maximum duration specified in clause 5.1 irrespective of the period of break of study (vide clause 11) or prevention (vide clause 9) in order that the candidate may be eligible for the award of the degree (vide clause 16). Extension beyond the prescribed period shall not be permitted.

#### 6. COURSE REGISTRATION FOR THE EXAMINATION

- **6.1** Registration for the end semester examination is mandatory for courses in the current semester as well as for the arrear courses failing which the candidate will not be permitted to move on to the higher semester. This will not be applicable for the courses which do not have an end semester examination.
- 6.2 The candidates who need to reappear for the courses which have only continuous assessment shall enroll for the same in the subsequent semester, when offered next, and repeat the course. In this case, the candidate shall attend the classes, satisfy the attendance requirements (vide clause 8), earn continuous assessment marks. This will be considered as an attempt for the purpose of classification.
- 6.3 If a candidate is prevented from writing end semester examination of a course due to lack of attendance, the candidate has to attend the classes, when offered next, and fulfill the attendance requirements as per clause 8 and earn continuous assessment marks. If the course, in which the candidate has a lack of attendance, is an elective, the candidate may register for the same or any other elective course in the subsequent semesters and that will be considered as an attempt for the purpose of classification.

#### ASSESSMENT AND EXAMINATION PROCEDURE FOR AWARDING MARKS

7.1

The MCA programme consist of Theory Courses, Theory cum Practical courses, Practical courses, Mini Project, Project Work, Industrial / Professional Training, and Internship. Performance in each course of study shall be evaluated based on (i) Continuous Assessments (CA) throughout the semester and (ii) End Semester Examination (ESE) at the end of the semester except for the courses which are evaluated based on continuous assessment only. Each course shall be evaluated for a maximum of 100 marks as shown below:

#### 7.1

Sl. No.	Category of Course	Continuous Assessment Marks	End Semester Examination Marks
1.	Theory	40	60
2.	Theory cum Practical (The distribution of marks shall be decided based on the credit weightage assigned to theory and practical components.)	50	50
3.	Practical	60	40
4.	Professional Skills Training / Industrial Training / Bridge Course / Mandatory Course	100	
5.	Mini Project / Project Work /Internship	50	50
6.	One / Two credit Course	The distribution of marks shall be decided based on the	
7.	All other Courses	credit weightage assigned	

**7.2** Examiners for setting end semester examination question papers for theory courses, theory cum practical courses and practical courses and evaluating end semester examination answer scripts, project works, and mini project shall be appointed by the Controller of Examinations after obtaining approval from the Principal.

# **7.3** Theory Courses

For all theory courses out of 100 marks, the continuous assessment shall be 50 marks and the end semester examination shall be for 50 marks. However, the end semester examinations shall be conducted for 100 marks and the marks reduced to 50. The continuous assessment tests shall be conducted as per the schedule laid down in the academic schedule. Three tests shall be conducted for 50 marks each and reduced to 30 marks each. The total of the continuous assessment marks and the end semester examination marks shall be rounded off to the nearest integer.

**7.3.1** The assessment pattern for awarding continuous assessment marks shall be as follows:

Sl. No.	Туре	Max. Marks	Remarks
1.	Test - I	12.5	
	Test - II	12.5	
2.	Tutorial / Others (Tutorial/Problem Solving (or) Simulation (or) Simulation & Mini Project (or) Mini Project (or) Case Studies (or) Any other relevant to the course)	10	Type of assessment is to be chosen based on the nature of the course and to be approved by Principal
3.	Assignment / Paper Presentation in Conference / Seminar / Comprehension / Activity based learning / Class notes	05	To be assessed by the Course Teacher based on any one type.
	Total	40	Rounded off to the one decimal place

However, the assessment pattern for awarding the continuous assessment marks may be changed based on the nature of the course and is to be approved by the Principal.

- 7.3.2 A reassessment test or tutorial covering the respective test or tutorial portions may be conducted for those candidates who were absent with valid reasons (Sports or any other reason approved by the Principal).
- **7.3.3** The end semester examination for theory courses shall be for duration of three hours.

# 7.4 Theory cum Practical Courses

For courses involving theory and practical components, the evaluation pattern as per the clause 7.1 shall be followed. Depending on the nature of the course, the end semester examination shall be conducted for theory and the practical components. The apportionment of continuous assessment and end semester examination marks shall be decided based on the credit weightage assigned to theory and practical components approved by Principal.

#### 7.5 Practical Courses

For all practical courses out of 100 marks, the continuous assessment shall be for 60 marks and the end semester examination shall be for 40 marks. Every exercise / experiment shall be evaluated based on the candidate's performance during the practical class and the candidate's records shall be maintained.

- **7.5.1** The assessment pattern for awarding continuous assessment marks for each course shall be decided by the course coordinator based on rubrics of that particular course, and shall be based on rubrics for each experiment.
- **7.5.2** The end semester examination shall be conducted for a maximum of 100 marks for duration of 3 hours and reduced to 40 marks. The appointment of examiners and the schedule shall be decided by chairman of Board of Study of the relevant board.

# 7.6 Project Work

- **7.6.1** Project work shall be carried out individually. Candidates can opt for full time internship (vide clause 7.10) in lieu of project work. The project work is mandatory for all the candidates.
- 7.6.2 The Head of the Department shall constitute review committee for project work. There shall be three assessments by the review committee during the semester. The candidate shall make presentation on the progress made by him/her before the committee.
- **7.6.3** The continuous assessment and end semester examination marks for Project Work and the Viva-Voce Examination shall be distributed as indicated below.

Continuous Assessment (Max. 50 Marks)					End Semester Examination (Max. 50 Marks)				
	view I 10 Marks)	Review (Max 20 N	_			Report Evaluation (Max. 20 Marks)		Viva - Voce (Max. 30 Marks)	
Rv. Com	Guide	Review Committee (excluding guide)	Guide	Review Committee (excluding guide)	Guide	Ext. Exr.	Guid e	Exr. 1	Exr. 2
5	5	10	10	10	10	20	10	10	10

- 7.6.4 The Project Report prepared according to approved guidelines and duly signed by the Supervisor shall be submitted to Head of the Department. The candidate(s) must submit the project report within the specified date as per the academic schedule of the semester. If the project report is not submitted within the specified date then the candidate is deemed to have failed in the Project Work and redo it in the subsequent semester.
- **7.6.5** If a candidate fails to secure 50% of the continuous assessment marks in the project work, he / she shall not be permitted to submit the report for that particular semester and shall have to redo it in the subsequent semester and satisfy attendance requirements.
- **7.6.6** Every candidate shall, based on his/her project work, publish a paper in a reputed journal or reputed conference in which full papers are published after usual review. A copy of the full paper accepted and proof for that shall be produced at the time of evaluation.
- 7.6.7 The project work shall be evaluated based on the project report submitted by the candidate in the respective semester and viva-voce examination by a committee consisting of two examiners and guide of the project work.

- **7.6.8** If a candidate fails to secure 50 % of the end semester examination marks in the project work, he / she shall be required to resubmit the project report within 30 days from the date of declaration of the results and a fresh viva-voce examination shall be conducted as per clause 7.6.7.
- **7.6.9** A copy of the approved project report after the successful completion of viva-voce examination shall be kept in the department library.

# 7.7 Mini Project

The evaluation method shall be same as that of the Project Work as per clause 7.6 excluding clause 7.6.6.

# 7.8 Industrial Training

After completion of Industrial training the candidate shall submit a brief report on the training undergone and a certificate obtained from the organization concerned. The evaluation will be made based on this report and a Viva-Voce Examination. A copy of the certificate (issued by the Organization) submitted by the candidate shall be attached to the mark list and sent to Controller of Examinations by the Head of the Department.

٠		

Continuous Assessment (Max. 100 Marks)							
Report Viva - Voce Evaluation (Max. 40 Marks) (Max. 60 Marks)							
Review Committee	Guide Review Committee						
40 20 40							

# 7.9 Professional Skills Training

The Professional Skills Training shall be conducted for minimum 80 hours in 1<sup>st</sup> semester vacation and during 2<sup>nd</sup> semester. The evaluation procedure shall be approved by the board of the offering department and Principal.

#### 7.10 Projects through Internships

Each candidate shall submit a brief report about the project through internship undergone and a certificate issued from the organization concerned at the time of Viva-voce examination to the review committee. The evaluation method shall be same as that of the Project Work as per clause 7.6.

#### 7.11 One / Two Credit Course

Minimum of two assessments shall be conducted during the one / two credit course duration by the offering department concerned.

#### 7.12 Online Course

The Board of Studies will provide methodology for the evaluation of the online courses. The Board can decide whether to evaluate the online courses through continuous assessment and end semester examination or through end semester examination only. In case of credits earned through online mode from NPTEL / SWAYAM / a University / Other Agencies approved by Chairman, Academic Council, the credits may be transferred and grades shall be assigned accordingly.

#### 7.13 Self Study Course

The member of faculty approved by the Head of the Department shall be responsible for periodic monitoring and evaluation of the course. The course shall be evaluated through continuous assessment and end semester examination. The evaluation methodology shall be the same as that of a theory course.

#### 7.14 Audit Course

A candidate may be permitted to register for specific course not listed in his/her programme curriculum and without undergoing the rigors of getting a 'good' grade, as an Audit course, subject to the following conditions.

The candidate can register only one Audit course in a semester starting from second semester subject to a maximum of two courses during the entire programme of study. Such courses shall be indicated as 'Audit' during the time of Registration itself. Only courses currently offered for credit to the candidates of other branches can be audited.

A course appearing in the curriculum of a candidate cannot be considered as an audit course. However, if a candidate has already met the Professional Elective and Open Elective credit requirements as stipulated in the curriculum, then, a Professional Elective or an Open Elective course listed in the curriculum and not taken by the candidate for credit can be considered as an audit course.

Candidates registering for an audit course shall meet all the assessment and examination requirements (vide clause 7.3) applicable for a credit candidate of that course. Only if the candidate obtains a performance grade, the course will be listed in the semester Grade Sheet and in the Consolidated Grade Sheet along with the grade SC (Successfully Completed). Performance grade will not be shown for the audit course.

Since an audit course has no grade points assigned, it will not be counted for the purpose of GPA and CGPA calculations.

#### 7.15 Bridge Courses

Four additional bridge courses shall be offered by the department. Since these courses have no credits, each one shall be evaluated through two continuous assessment tests for a maximum of 50 marks each. Letter grades will be assigned and It will not be considered for the calculation of GPA and CGPA.

#### 8. REQUIREMENTS FOR COMPLETION OF A SEMESTER

- **8.1** A candidate who has fulfilled the following conditions shall be deemed to have satisfied the requirements for completion of a semester and permitted to appear for the examinations of that semester.
  - **8.1.1** Ideally, every candidate is expected to attend all classes and secure 100 % attendance. However, a candidate shall secure not less than 80 % (after rounding off to the nearest integer) of the overall attendance taking into account the total number of working days in a semester.
  - 8.1.2 A candidate who could not satisfy the attendance requirements as per clause 8.1.1 due to medical reasons (hospitalization / accident / specific illness) but has secured not less than 70 % in the current semester may be permitted to appear for the current semester examinations with the approval of the Principal on payment of a condonation fee as may be fixed by the authorities from time to time. The medical certificate needs to be submitted along with the leave application. A candidate can avail this provision only twice during the entire duration of the degree programme.
  - **8.1.3** In addition to clause 8.1.1 or 8.1.2, a candidate shall secure not less than 60 % attendance in each course.
  - **8.1.4** A candidate shall be deemed to have completed the requirements of study of any semester only if he/she has satisfied the attendance requirements (vide clause 8.1.1 to 8.1.3) and has registered for examination by paying the prescribed fee.
  - **8.1.5** Candidate's progress is satisfactory.
  - **8.1.6** Candidate's conduct is satisfactory and he/she was not involved in any indisciplined activities in the current semester.
- **8.2.** The candidates who do not complete the semester as per clauses from 8.1.1 to 8.1.6 except 8.1.3 shall not be permitted to appear for the examinations at the end of the semester and not be permitted to go to the next semester. They have to repeat the incomplete semester in next academic year.
- **8.3** The candidates who satisfy the clause 8.1.1 or 8.1.2 but do not complete the course as per clause 8.1.3 shall not be permitted to appear for the end semester examination of that course alone. They have to repeat the incomplete course in the subsequent semester when it is offered next.

# 9. REQUIREMENTS FOR APPEARING FOR END SEMESTER EXAMINATION

- 9.1 A candidate shall normally be permitted to appear for end semester examination of the current semester if he/she has satisfied the semester completion requirements as per clause 8, and has registered for examination in all courses of that semester. Registration is mandatory for current semester examinations as well as for arrear examinations failing which the candidate shall not be permitted to move on to the higher semester.
- 9.2 When a candidate is deputed for a National / International Sports event during End Semester examination period, supplementary examination shall be conducted for such a candidate on return after participating in the event within a reasonable period of time. Such appearance shall be considered as first appearance.
- **9.3** A candidate who has already appeared for a course in a semester and passed the examination is not entitled to reappear in the same course for improvement of letter grades / marks.

#### 10. PROVISION FOR WITHDRAWAL FROM EXAMINATIONS

- 10.1 A candidate may, for valid reasons, be granted permission to withdraw from appearing for the examination in any regular course or all regular courses registered in a particular semester. Application for withdrawal is permitted only once during the entire duration of the degree programme.
- 10.2 The withdrawal application shall be valid only if the candidate is otherwise eligible to write the examination (vide clause 9) and has applied to the Principal for permission prior to the last examination of that semester after duly recommended by the Head of the Department.
- 10.3 The withdrawal shall not be considered as an appearance for deciding the eligibility of a candidate for First Class with Distinction/First Class.
- 10.4 If a candidate withdraws a course or courses from writing end semester examinations, he/she shall register the same in the subsequent semester and write the end semester examinations. A final semester candidate who has withdrawn shall be permitted to appear for supplementary examination to be conducted within reasonable time as per clause 14.
- 10.5 The final semester candidate who has withdrawn from appearing for project viva-voce for genuine reasons shall be permitted to appear for supplementary viva-voce examination within reasonable time with proper application to Controller of Examinations and on payment of prescribed fee.

#### 11. PROVISION FOR BREAK OF STUDY

- 11.1 A candidate is normally permitted to avail the authorised break of study under valid reasons (such as accident or hospitalization due to prolonged ill health or any other valid reasons) and to rejoin the programme in a later semester. He/She shall apply in advance to the Principal, through the Head of the Department, stating the reasons therefore, in any case, not later than the last date for registering for that semester examination. A candidate is permitted to avail the authorised break of study only once during the entire period of study for a maximum period of one year. However, in extraordinary situation the candidate may apply for additional break of study not exceeding another one year by paying prescribed fee for the break of study.
- 11.2 The candidates permitted to rejoin the programme after break of study / prevention due to lack of attendance shall be governed by the rules and regulations in force at the time of rejoining.
- 11.3 The candidates rejoining in new Regulations shall apply to the Principal in the prescribed format through Head of the Department at the beginning of the readmitted semester itself for prescribing additional/equivalent courses, if any, from any semester of the regulations in-force, so as to bridge the curriculum in-force and the old curriculum.
- 11.4 The total period of completion of the programme reckoned from the commencement of the semester to which the candidate was admitted shall not exceed the maximum period specified in clause 5 irrespective of the period of break of study in order to qualify for the award of the degree.
- 11.5 If any candidate is prevented for want of required attendance, the period of prevention shall not be considered as authorized break of study.
- 11.6 If a candidate has not reported to the college for a period of two consecutive semesters without any intimation, the name of the candidate shall be deleted permanently from the college enrollment. Such candidates are not entitled to seek readmission under any circumstances.

#### 12. PASSING REQUIREMENTS

- 12.1 A candidate who secures not less than 50 % of total marks (continuous assessment and end semester examination put together) prescribed for the course with a minimum of 45 % of the marks prescribed for the end semester examination in all category of courses vide clause 7.1 except for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course in the examination.
- 12.2 A candidate who secures not less than 50 % in continuous assessment marks prescribed for the courses which are evaluated based on continuous assessment only shall be declared to have successfully passed the course. If a candidate secures less than 50% in the continuous assessment marks, he / she shall have to re-enroll for the same in the subsequent semester and satisfy the attendance requirements.

12.3 For a candidate who does not satisfy the clause 12.1, the continuous assessment marks secured by the candidate in the first attempt shall be retained and considered valid for subsequent attempts. However, from the fourth attempt onwards the marks scored in the end semester examinations alone shall be considered, in which case the candidate shall secure minimum 50 % marks in the end semester examinations to satisfy the passing requirements.

#### 13. REVALUATION OF ANSWER SCRIPTS

A candidate shall apply for a photocopy of his / her semester examination answer script within a reasonable time from the declaration of results, on payment of a prescribed fee by submitting the proper application to the Controller of Examinations. The answer script shall be pursued and justified jointly by a faculty member who has handled the course and the course coordinator and recommended for revaluation. Based on the recommendation, the candidate can register for revaluation through proper application to the Controller of Examinations. The Controller of Examinations will arrange for revaluation and the results will be intimated to the candidate concerned. Revaluation is permitted only for Theory courses and Theory cum Practical courses where end semester examination is involved.

#### 14. SUPPLEMENTARY EXAMINATION

If a candidate fails to clear all courses in the final semester after the announcement of final end semester examination results, he/she shall be allowed to take up supplementary examinations to be conducted within a reasonable time for the courses of final semester alone, so that he/she gets a chance to complete the programme.

# 15. AWARD OF LETTER GRADES

For all the passed candidates, the relative grading principle is applied to assign the letter grades.

Marks / Examination Status	Letter Grade	Grade Point
	O (Outstanding)	10
	A+ (Excellent)	9
Passed on the valative and ding	A (Very Good)	8
Based on the relative grading	B+ (Good)	7
	B (Average)	6
	C (Satisfactory)	5
Less than 50	U (Reappearance)	0
Successfully Completed	$\operatorname{SC}$	0
Withdrawal	W	-
Absent	AB	-
Shortage of Attendance in a course	SA	-

The Grade Point Average (GPA) is calculated using the formula:

GPA = 
$$\frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in the specific semester}}{\sum(\text{course credits}) \text{ for all courses in the specific semester}}$$

The Cumulative Grade Point Average (CGPA) is calculated from first semester (third semester for lateral entry candidates) to final semester using the formula

CGPA= 
$$\frac{\sum[(\text{course credits}) \times (\text{grade points})] \text{ for all courses in all the semesters so far}}{\sum(\text{course credits}) \text{ for all courses in all the semesters so far}}$$

The GPA and CGPA are computed only for the candidates with a pass in all the courses.

The GPA and CGPA indicate the academic performance of a candidate at the end of a semester and at the end of successive semesters respectively.

A grade sheet for each semester shall be issued containing Grade obtained in each course, GPA and CGPA.

A duplicate copy, if required can be obtained on payment of a prescribed fee and satisfying other procedure requirements.

Withholding of Grades: The grades of a candidate may be withheld if he/she has not cleared his/her dues or if there is a disciplinary case pending against him/her or for any other reason.

#### 16. ELIGIBILITY FOR THE AWARD OF DEGREE

A candidate shall be declared to be eligible for the award of the MCA Degree provided the candidate has

- i. Successfully completed all the courses under the different categories, as specified in the regulations.
- ii. Successfully gained the required number of total credits as specified in the curriculum corresponding to the candidate's programme within the stipulated time (vide clause 5).
- iii. Successfully passed any additional courses prescribed by the Board of Studies whenever readmitted under regulations other than R-2020 (vide clause 11.3)
- iv. No disciplinary action pending against him / her.

#### 17. CLASSIFICATION OF THE DEGREE AWARDED

#### 17.1 First Class with Distinction:

- A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class with Distinction:
  - Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
  - Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
  - Should have secured a CGPA of not less than 8.50

(OR)

Acandidate who joins from other institutions on transfer or a candidate who gets readmitted and has to move from one regulations to another regulations and who qualifies for the award of the degree (vide clause 16) and satisfies the following conditions shall be declared to have passed the

examination in First class with Distinction:

- Should have passed the examination in all the courses of all the four semesters in the **First Appearance** within four consecutive semesters excluding the authorized break of study (vide clause 11) after the commencement of his / her study.
- Submission of equivalent course list approved by the Board of studies.
- Withdrawal from examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 9.00

#### 17.2 First Class:

A candidate who qualifies for the award of the degree (vide clause 16) and who satisfies the following conditions shall be declared to have passed the examination in First class:

- Should have passed the examination in all the courses of all four semesters within six consecutive semesters excluding authorized break of study (vide clause 11) after the commencement of his / her study.
- Withdrawal from the examination (vide clause 10) shall not be considered as an appearance.
- Should have secured a CGPA of not less than 6.50

#### 17.3 Second Class:

All other candidates (not covered in clauses 17.1 and 17.2) who qualify for the award of the degree (vide clause 16) shall be declared to have passed the examination in Second Class.

17.4 A candidate who is absent for end semester examination in a course / project work after having registered for the same shall be considered to have appeared for that examination for the purpose of classification.

#### 18. MALPRACTICES IN TESTS AND EXAMINATIONS

If a candidate indulges in malpractice in any of the tests or end semester examinations, he/she shall be liable for punitive action as per the examination rules prescribed by the college from time to time.

#### 19. AMENDMENTS

Notwithstanding anything contained in this manual, the Kongu Engineering College through the Academic council of the Kongu Engineering College, reserves the right to modify/amend without notice, the Regulations, Curricula, Syllabi, Scheme of Examinations, procedures, requirements, and rules pertaining to its MCA programme.

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	apply logical operations and predicate calculus to solve problems	Applying (K3)
CO2	explain the concept of sets, relation and functions for designing and solving problems	Understanding (K2)
CO3	make use of probability and the distribution of discrete and continuous ideas in solving real world problems	Applying (K3)
CO4	apply the concept of testing of hypothesis for small and large samples in real life problems	Analyzing(K4)
CO5	use the appropriate statistical technique to design of experiments in data analysis	Analyzing (K4)

# Mapping of COs with POs and PSOs

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	2		1			1					1	1	1
CO2	3	2										1		
CO3	3	3	1	2	1		1				1	1	1	1
CO4	3	3	1	2	1		1				1	1	1	1
CO5	3	3	1	2	1		1			1	1	1	1	1

1 - Slight, 2 - Moderate, 3 - Substantial, BT- Bloom's Taxonomy

Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6)	Total %

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	apply the various formal and agile life cycle models of software engineering	Applying (K3)
CO2	develop the various features of requirement analysis and modeling of software	Applying (K3)
CO3	apply architectural and functional design of the software	Applying (K3)
CO4	evaluate the quality of software process	Evaluating (K5)
CO5	estimate an idea about risk management and software maintenance	Evaluating (K5)

COURSE OUTCOMES: On completion of the course, the students will be able to		BT Mapped (Highest Level)	
CO1	dramatize object oriented programming concepts for solving simple logics	Applying (K3)	
CO2	construct reusable classes using inheritance, packages and interfaces	Applying (K3)	
CO3	apply the concepts of Multithreading, Exception handling and Collection Frameworks to develop efficient and error free codes.	Applying (K3)	
CO4	develop Serverside java applications using Servlet and JSP concepts	Applying (K3)	
CO5	construct simple applications to best interact with relational database systems using JDBC and hibernate	Applying (K3)	

#### Mapping of COs with POs and PSOs

Progra Branc	amme& h	MCA & Computer Applications	Sem.	Category	L	Т	P	Credit
Prered	quisites	Nil	2	PC	0	0	4	2
Pream	ble	To develop General purpose and web based applic	cations					
LIST	OF EXPERI	MENTS / EXERCISES:						
1.		Class which consists of instance variables and method						s all the members
		and create more than one objects and store the refere						
2.	with sam	t a class with more than one methods having same re name, with different input parameters.						
3.	implemer functiona	java classes which acquire the properties of the pare nation of the method that has been declared by one lity at runtime. Design another class that implement lefault methods with the same name and signature.	of its parent cla	ass and creat	e an	obje	ct whi	ch should bound it
4.	group wit	an application with a custom-container that should h proper access protection and namespace managem	nent.					
5.	Design el code.	rror events in java that occurs during the execution of	a program and	d disrupts the	norr	nal e	execut	ion of the program
6.	Write a ja	ava program with Light-weight sub-processes that s	hould be exec	uted concurr	ently	to n	naximi	ze the utilization
7.	Design a class.	dynamic array using collection class ArrayList and im	plement the Lir	nked list datas	struc	ture i	using	LinkedList collection
8.	•	nt a Java Servlet Program to implement a dynamic HT						
9.		java application that should establish the connection and Hibernate.	on from Java C	Client to any	relat	ional	datal	pase systems usin
10.	Create a	simple applicationusing Spring Framework.						
	Report m Availabilit Search M	e module: This has two functions – Insertion of data ar odule: For the borrowed books list to display. ty module: To view the availability of books. lodule: search facility for books and members. the system:	nd extraction of	data.				
		ctions:  Add, view, delete the book details and user details, is view and requesting books, returning books.	ssue and return	books.				
12.	_	n employee payroll management system with basic m	odules and its p	processes as				
	•	Admin can Add/Edit/delete the employees. Admin can Add/Edit/delete the schedule the work of the Admin can Add and calculate/Edit/Delete the Salary o						
	•	Employees can view his/her schedule set by Admin. Employees can check his/her attendance. Employees can update his/her details. Employees can View their salary details.						
13.	Three ma Reception Admin Mo	odule:		e application	are A	dmir	n, Doc	tor and
	•	Admin can ADD/DELETE/UPDATE a doctor.  Admin can VIEW the list of doctors.  Admin can ADD/DELETE/UPDATE a receptionist.  Admin can VIEW the list of receptionists.  Admin can ADD/DELETE/UPDATE a patient.						

Admin can ADD/DELETE/UPDATE an appointment.

#### **Doctor Module:**

- The doctor can VIEW the appointments.
- The doctor can VIEW the patient list.

#### Receptionist Module:

- The receptionists can ADD/EDIT/VIEW appointments.
- The receptionists can ADD/EDIT/VIEW the patient.
- 14. Design an Electricity bill management system with basic modules and its processes as follows

#### Login registration:

- Admin(Electricity board user), and User(Customer) can log in and register in the application.
- Admin can add a new user in the application as well as a new customer also can log in by itself by using its
  consumer number.

#### Billing:

- Admin can add details about the consumer details according to the consumed electricity units consumed by the consumer.
- Users can view the bill
- 15. Design an online Quiz system with basic modules and its processes as follows

#### Users of the System

- Teacher
- Student

#### **Functional Requirements**

#### Teacher:

- Can create quiz after getting logged in.
- Can enter subjects and enter question with its options and answer at the time of creating quiz.
- 10 Question for each quiz required to be completed.

#### Student:

- Can search quiz according to their interest.
- select the id of quiz and ready to start it.
- After completing all questions, result will be displayed automatically.
- Can view the description about each and every question in the respective quiz.

	22GCL21 – PROFESSIONAL SKILLS TRAINING												
Programme & Branch	Master of Computer Applications	Sem.	Category	L	Т	Р	Credit						
Prerequisites	Nil	2	PC	0	0	80	2						
Preamble	This subject is to enhance the employability skills	and to develop caree	r competency	<i>/</i> .									
Unit – I	Soft Skills:						20						

**Soft skills and its importance:** Pleasure and pains of transition from an academic environment to work – environment-Need forchange- Fears, stress and competition in the professional world-Importance of positive attitude- Self motivation and continuousknowledge up gradation-Self-confidence.**Professional grooming and practices:** Basics of corporate culture-Key pillars of businessetiquette- Basics of etiquette-Introductions and greetings-Rules of the handshake, earning respect, business manners-Telephoneetiquette- Body Language.**Group discussions:** Advantages of group discussions-Structured GD-**Team work:** Value of team work inorganizations- Definition of a team, why team-Elements of leadership, disadvantages of a team, stages of team formation- Groupdevelopment activities.**Facing an interview:** Foundation in core subject- industry orientation / knowledge about the company-professional personality-Communication skills-Activities before Interview, upon entering interview room, during the interview and at theendMockinterviews.

## Unit – II Quantitative Aptitude and Logical Reasoning:

30

**Problem Solving:** Number Systems - LCM/HCF - divisibility - Simple Equations - Ratio Proportion Variations - Percentages; Profitand Loss - Partnerships -Simple Interest Compound Interest -Averages - Mixtures and Allegations - Time and Work -Time and Distance -Data Interpretations-Tables -Bar Graph -Line Graph -Pie Chart -Caselets - Geometry - Mensuration -Permutation and Combinations - Probability -Quadratic Equations - Special Equations and Inequalities - Sequence and Series - Statistics - Logarithms -Data Sufficiency - Trigonometry - Coordinate Geometry.**Logical Reasoning:** Letter Series - Number Series -Blood Relations -Direction Sense - Coding-Decoding - Symbols and Notations -Clocks and Calendars - Puzzles - Seating Arrangement (Linear and Circular) - Selections and Distributions -Cubes - Venn Diagrams -Deductions/Syllogism -Cyrptogrithms - Flaw Detection - BinaryLogic

## Unit – III Grammar, Vocabulary, Listening, Speaking, Reading and Writing:

30

Grammar: Tenses - Articles and Prepositions - Direct & Indirect Speeches - Active & Passive voice - Vocabulary: Analogies - Syllogism - Spelling test - Cloze test - Concord - Spotting Errors - Unscrambling words - Assertion and Reason - Verbal puzzle - Pair words - Logical sequence of words - Listening: Listening to TED talks, ESL & ESOL Videos - Podcasts - Speaking: Mock Interviews - Personality traits - Better pronunciation - Extempore talk - Telephonic conversations - Technical project presentations - Role Play - Negotiation skills - Mock Interview - Life skills - Team Management - Leadership skills - Group Discussion - Reading: Reading with stress, pauses, slurs and fillers - Soft skills - Stress & Intonation - Effective reading strategies - Notices & book reviews - GATE type reading comprehension - Writing: Job application letter & resume - Video resume - Jumbled sentences - Professional e-mail writing - Business letters - One page essay - Report writing - Editing & proofreading - Writing skills for IELTS - Summary Writing - Review of real time interviews/Competitive examinations.

COUR	SE OUTCOMES:	BT Mapped
On co	mpletion of the course, the students will be able to	(Highest Level)
CO1	understand the importance of software testing in software development.	Understanding (K2)
CO2	apply testing operations, manage software defects, and generate a testing report using testing techniques.	Applying (K3) Precision (S3)
CO3	implement the various software testing techniques like performance testing, regression testing, and ad-hoc testing.	Applying (K3) Manipulation (S2)
CO4	understand the concepts of software testing and appraise the most appropriate life cycle based testing and model based testing approaches for a given situation.	Understanding (K2)
CO5	use the test driven development approaches and identify the complexity of the project by developing the necessary test cases and testing methods based on the implementation of various problems.	Understanding (K2)

Preamble	е	To provide the strong foundation in PHP Programm development.	ing and M	1YSQL platfo	rm	for v	web	application
Unit – I		PHP:						9
Condition	nals-Loopino		Control F	low in PHP:	Ex	press	ions-	
Unit – II		PHP Functions, Objects and Arrays: uding and Requiring Files-PHP Version Compatibility-PHP (	Nicota DUI	Arrova: Paci	io A4	20000	for	9
		ays-Array Functions.	objects-Fi ir	Allays. Dasi	.C A	00633	- 101	each loop
Unit – III		MySQL:						9
		cessing MySQL via the Command Line-Indexes-MySactions-Backing Up and Restoring.	QL Funct	ions-Database	) D	esigi	n-Nor	malization
Unit – IV		Form Handling:						9
	Forms-Retri cation-Using	ieving Submitted Data-HTML5 Enhancements-Cookies, Ses	sions, Auth	entication-Usir	ng C	Cookie	es in	PHP-HTT
Unit – V		jQuery:						9
		ctors-Handling Events-Event Functions and Properties-S	Special Effe	ects-Manipulat	ting	the	DOM	
Dimensio	ons-DOM Tr	raversal-Using jQuery Without Selectors-Using Asynchronou	s Communi	cation.				
		ENTS / EXERCISES:						
1.	Write a PHP	to evaluate expressions using different kind of operators						
2.	Write a PHF	P program to demonstrate the use of decision making control	structures	using a. If stat	eme	ent b	If-els	se
;	statement c.	. Switch statement						
3.	Write a PHF	P program to demonstrate the use of looping structures using	- a. While s	tatement b. D	o-wł	nile s	tatem	ent c. Fo
;	statement d	. Foreach statement						
4.	Develop a P	PHP code to perform various task using user defined function	S					
5.	Write a PHF	P code to perform string handling operations with and without	using built	in functions.				
6.	Write a PHF	P program for creating and manipulating- a. Indexed array b.	Associative	e array				
(	c. Multidime	ensional array						
7.	Write a PHF	program to a. Inherit members of super class in subclass. b	. Create co	nstructor to ini	itiali	ze ob	ject c	of class by
1	using object	t oriented concepts.						
8.	Create a My	/SQL database with proper normalization and perform DDL a	and DML op	erations				
9.	Using MySC	QL, perform various file format like excel, csv data loading, ba	ackup and r	estoring the da	atab	ase i	nform	nation.
10. I	Design a Ph	HP Form and use regular expression to validate the fields.						
11.	Write a PHF	P program to –						
(	a. set cookie	es and read it.						
	b. demonstr	rate session management.						
12.	Write a PHF	program for sending and receiving plain text message (e -n	nail).		-			
	Implement a	a PHP application to process student on-duty requisition						
13.		a PHP application to store and retrieve student co and extra	curricular in	formation				
	Implement a	a FITE application to store and Tetrieve student co and extra-		ioiiiiatioii				
14.		PHP code to create and download PDF file while accessing o			ort G	Sener	ation	)

COURS	SE OUTCOMES:	BT Mapped
On con	npletion of the course, the students will be able to	(Highest Level)
CO1	understand the fundamentals of full stack development	Understanding (K2) Imitation (S1)
CO2	interpret the components of mean architecture and development environment	Applying (K3) Precision (S3)
CO3	employ the various techniques of node, express and mongoDB	Applying (K3) Precision (S3)
CO4	prioritize the different forms of REST API in the web application development	Analyzing (K4) Manipulation (S2)
CO5	make use of the advanced techniques to develop dynamic front end with angular	Applying (K3) Precision (S3)

					Mappin	g of CO	s with	POs an	d PSO	5				
COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	3	2		2								3	
CO2	3	3	3										3	
CO3	3	3	3	2	2	2	2		2	2	2		3	
CO4	3	3	3	3	2		2	2	2	2	2	2	3	
CO5	3	3	3	2		2	2					2	3	

<sup>1 –</sup> Slight, 2 – Moderate, 3 – Substantial, BT- Bloom's Taxonomy

	ASSESSMENT PATTERN – THEORY												
Test / Bloom's Category*	Remembering (K1) %	Understanding (K2) %	Applying (K3) %	Analyzing (K4) %	Evaluating (K5) %	Creating (K6) %	Total %

Pream	ble	To learn and apply the object oriented concepts in	n problem solving					
Unit –	I	Perspective on C++ :						10
Function	on, Functio	ct Oriented Programming – Beginning with C++ - To n Prototyping, Call by Value, Call by Reference, on Overloading.						
Unit -		Classes, Objects and Operator Overloading:						10
		ects – Constructors and Destructors. Operator Operator using Friend function – Friend Class.	Overloading: overloa	iding Unary	and	Bina	ry Op	erators
Unit –	III	Inheritance and Runtime Polymorphism:						10
		e, Multilevel, Multiple, Hierarchical, Hybrid, Virtual inters, Dynamic Memory Allocation, Virtual Functions		structors in D	erive	ed cl	asses	. Runtim
LIST C	F EXPERIM	MENTS / EXERCISES:						
1.	Simple C+	++ program for simple Functions, Inline function, defa	ult function argument					
2.	Program t	o implement Recursion in simple tasks						
3.	C++ progr	ram to implement Class and Objects						
4.	Program t	o demonstrate Constructors & Destructors						
5.	Design ap	plications using Function overloading						
6.	Program t	o implement Operator overloading in operators.						
7.	Program t	o illustrate Friend Function and Friend Class.						
8.	Programs	to Implement Inheritance concepts.						
9.	Write a pr	ogram for Function overriding concept.						
10.	Use new a	and delete operators to implement Dynamic memory	allocation.					
				Lecture:3	0, P	racti	cal:15	i, Total:4
REFE	RENCES/ M	ANUAL / SOFTWARE:						
1.	Balagurus	amy E., "Object-Oriented Programming with C++",8 <sup>th</sup>	Edition, McGraw Hill	EducationPv	t.Ltd	., 202	21.	
	Herbert So	childt, "C++: The Complete Reference", 4 <sup>th</sup> Edition, M	IcGraw Hill Education	Pvt.Ltd.,2021				
2.								

	SE OUTCOMES: mpletion of the course, the students will be able to	BT Mapped (Highest Level)
CO1	explain the fundamentals of the Object Oriented concepts and C++ features	Understanding (K2)
CO2	make use of Constructor, Destructor, Friend function and Operator Overloading to solve problems	Applying (K3) Manipulation (S2)
CO3	solve various scenarios using the Concepts of the Inheritance and Polymorphism	Applying (K3) Manipulation (S2)
CO4	model the applications for demonstrating basic C++ features	Applying (K3) Precision (S3)
CO5	experiment the working of Inheritance, Polymorphism and Exception Handling under various circumstances	Applying (K3) Precision (S3)

Mapping of COs	with POs and PSOs
----------------	-------------------

COs/POs	PO1	PO2	PO3	PO4	PO5	PO6	P07	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
